SUMMARY:

Software Engineer. CDL Driver. Experience gained through the completion of the TripleTen Software Engineer boot-camp program, which ran from October 1st, 2024, to March 12th, 2025. Prior to this, a 5 ½ year tenure as a CDL Driver with The Coeur d'Alene Window Company ended on January 17th, 2025. Alongside the boot camp, various private projects were undertaken previously, focusing on UI design and functionality, utilizing Unreal Engine and Unity. Proficient in HTML, CSS, JavaScript, React.js, Node.js, Express, MongoDB, C++/Blueprint, and C#.

TECHNICAL PROJECTS:

Languages/Tools: *HTML | CSS | Javascript | React.js | Node.js | Express.js | MongoDB | Nginx | Certbot*

PLANET PLEDGE– [Live](#) | [Frontend Source Code](#) | [Backend Source Code](#) | [Demo](#)

- This was a team challenge and competition that was to be completed within a week; our team won.
- This website encourages users to commit to planet-saving measures, provides a quiz to check their current actions, and provides access to a few external supportive resources that help additional actions.
- Users can post “pledges” that can be seen by other users. The quiz requires certain validation prior to allowing submission. Resources have links that open in a separate window. Website scales to device size.
- Backend has request restrictions, CORS protections, Schema parameters and limitations, error handling with specified definitions, and JWT secret key requirements.

NEWS EXPLORER– [Live](#) | [Frontend Source Code](#) | [Backend Source Code](#) | [Demo](#)

- This website asks the user for their location, gives them the current weather and a 6-day forecast, provides current stock information for popular companies, and allows users to search for articles.
- Users can register an account and login, favorite and like articles (where “favoriting” saves it to their account and “liking” adds to a server-wide list that updates the like count), and can update their name and avatar.
- The interface adapts based on the user's screen size, forms have built-in validation, server has responses regarding authorization and conflicts, and back-up information is provided for each variable.
- Backend has restrictions, protections, authentication, validation, and several other features.

WTWR: Weather App – [Live](#) | [Frontend Source Code](#) | [Backend Source Code](#) | [Demo](#)

- This website asks the user for their location, provides them the current weather, and suggests pieces of clothing based on the weather.
- Users can register and login, add and delete items, like other user's items, and update their name and avatar.
- The interface adapts based on the user's screen size, forms have built-in validation, server has responses regarding authorization and conflicts, and back-up information is provided for each variable.
- Backend has restrictions, protections, authentication, validation, and several other features.

RESPONSIBILITIES:

Performed thorough pre- and post-trip inspections, reported and coordinated repairs, and maintained truck and trailer cleanliness. Verified load paperwork, secured freight, and routed efficiently while adjusting to road conditions with ongoing safety checks. Managed loading, unloading, yard moves, and accurate delivery documentation. Communicated issues effectively, ensured resolutions, and provided excellent customer service. Also assisted in training new CDL drivers. Previous roles included supervision, delegation, cooking, stocking, inventory, cashiering, dishwashing, construction, landscaping, and sprinkler installation. These experiences reflect a strong work ethic, adaptability, and commitment to safety and efficiency across diverse roles.
